## PROJECTS

---

### Generalizing Transfer Learning in Reinforcement Learning with Regularizations

*May 2019*

- Co authored a technical about the possibility to use transfer learning in combination with Reinforcement learning techniques.
- read the report and code on my portfolio page [www.eosland.no/projects.html](http://www.eosland.no/projects.html)

### Vinmonopolet 2.0 and Cards Against Humanity - Webapps

*Oct 2015*

- Designed and developed two webapps using Meteor.js
- Vinmonopolet 2.0 lets you find out what kind of drinks from Vinmonopolet gets you the most alcohol per KR. View the app at [www.bit.ly/vinmtwo](http://www.bit.ly/vinmtwo)
- In the cards against humanity webapp you can play the popular card game cards against humanity with your friends online. View the app at [www.bit.ly/cvhakon](http://www.bit.ly/cvhakon)

### Waffle Town - React Native application

*Feb 2017*

- Developed an MVP application for a social network where you can share pictures of your waffles during a hackathon held by the student council for informatics students.
- The app also uses Microsoft Computer Vision API to confirm that you are posting pictures off waffles
- You can download the app from the Play store here: [www.bit.ly/waffeltown](http://www.bit.ly/waffeltown)
